

# Executive education for sustainable leaders

**Short courses and bespoke solutions**

## We've partnered with Grant Thornton to increase leadership in sustainability.

In today's rapidly changing world, effective leadership in sustainability is critical to driving positive environmental, social, and economic outcomes. Through a combination of real-world case studies, collaborative discussions, and practical tools, you will learn how to inspire sustainable practices, foster innovation, and navigate the complexities of creating lasting impact in your organisation.

These courses are underpinned by cutting-edge research and rooted in industry experience. Delivered by Teesside University, global experts in sustainability leadership and home to the Net Zero Industry Innovation Centre.

This partnership combines Teesside's track-record for academic excellence with Grant Thornton's practical expertise and industry networks, providing learners with an innovative and future-facing learning experience.

### SHORT COURSES:

**Sustainability Discovery Day (half-day course)**

**The Sustainable Leader (two-day course)**

**Deep Dive into Sustainability Topics (12-week modules)**

**Bespoke Sustainability Solutions**
